THE FOUR EVALUATION QUESTIONS

four distinct questions -- they are not a ladder, and passing one does not establish the next.

Q1 MEMORIZATION
Could it just be remembering a stored answer?

Q2 DISTRIBUTIONAL GENERALIZATION
Does it work on new examples of the same task?

Q3 SURFACE GENERALIZATION
Does it survive a change of wording or identifiers?

Q4 STRUCTURAL GENERALIZATION
Can it combine things it knows in a way it never saw?

Report these separately — passing one question does not establish the next.
